Golden spoon

```
Silver Spoon +  →  Basic UI/UX  →  Functions
                                       ↓
Variables       →  Binary       →  logic gates
                                       ↓
Conditionals    →  Loops        →  Reliable app
                                       ↓
Events          →  Projects
```
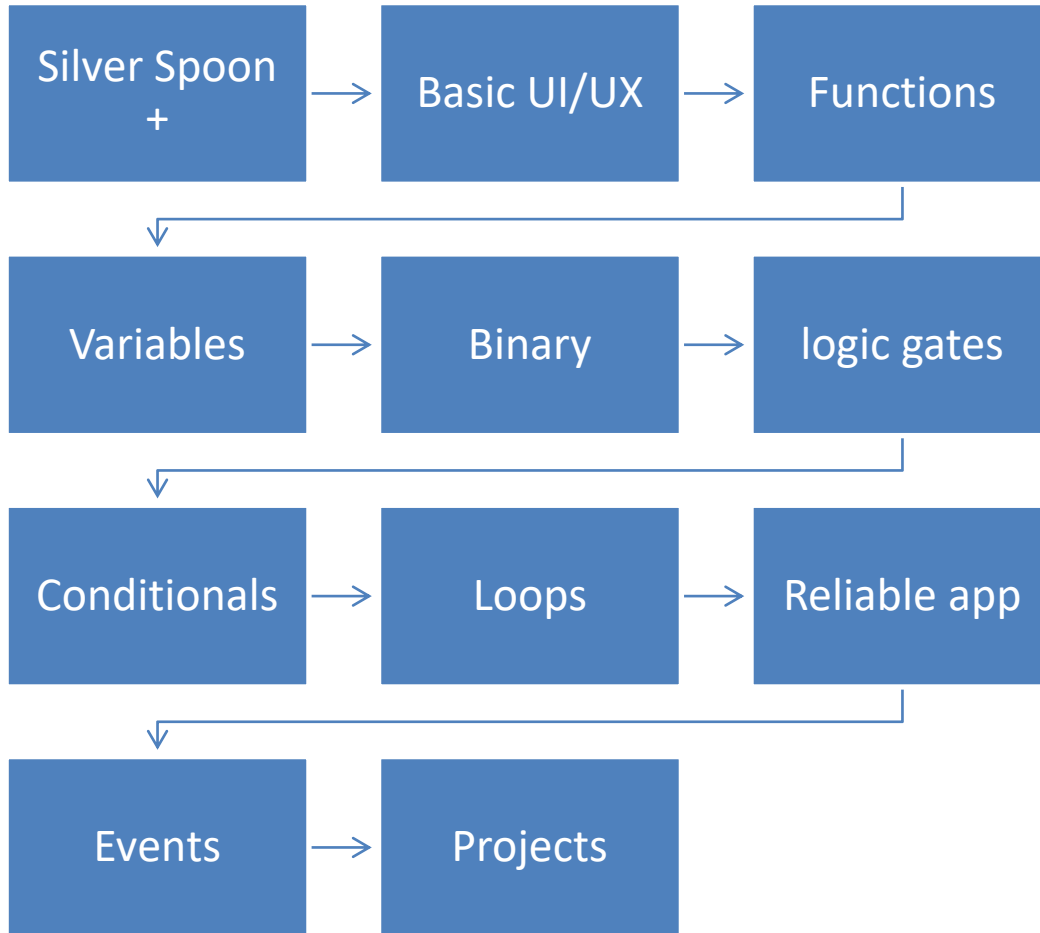

Learning

- 1. Internet safety level 2
- 2. Diving deep into programming, create programs with loops, events and conditionals
- 3. Learn the user of binary and logic gates
- 4. Collaboration technique, investigation and critical thinking skills
- 5. Debugging of code
- 6. Maintain persistence in the face of difficult tasks

Outcome

- 1. Make advanced animations, and stories
- 2. Create a story based game
- 3. Create simulation, like planetary system, eclipse etc.
- 4. Create interactive game
- 5. Make GUI games
- 6. Can Publish and Share the work
