Platinum spoon

aptcoder
access the potential

Pyramid (top to bottom):
- Golden Spoon +
- Internet exploring
- Advanced UI/UX
- Arguments
- Arrays
- Classes
- Objects
- CSS
- OOPS
- Database
- APIs
- Artificial Intelligence
- Machine Learning
- Coding community
- Projects
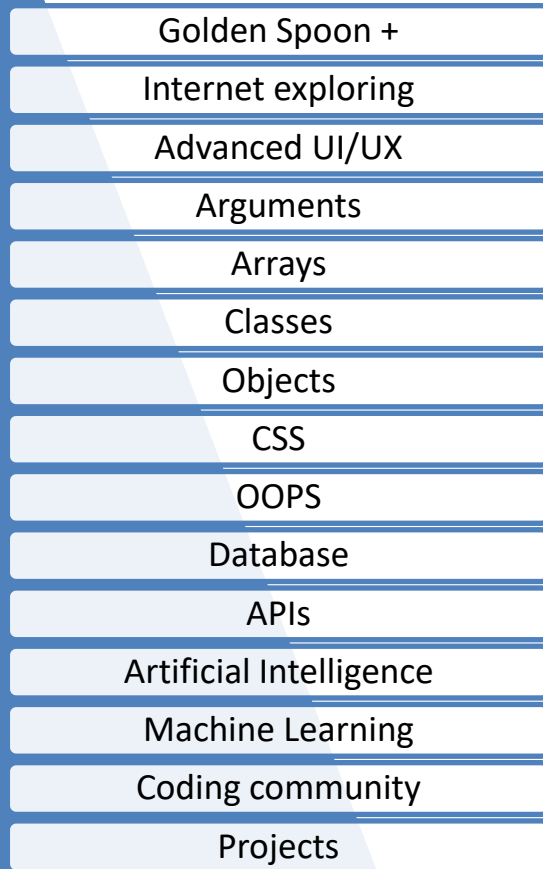

Learning

- 1. Power of internet
- 2. Solving complex problems using, function arguments, arrays
- 3. Advance UI with CSS and layout management
- 4. Objects and OOPs concepts
- 5. Database and APIs
- 6. Artificial intelligence and machine learning
- 7. Algorithmic thinking
- 8. Keypress and mouse events
- 9. Coding community and its power

Outcome

- 1. Create simulation and stories for fighter aircrafts
- 2. Make simulations for missile technology
- 3. Make Space technology simulation
- 4. Develop interactive gaming apps
- 5. Design motion and shooting games
- 6. Create ever running games using data types
- 7. Develop apps with database
- 8. Make apps for own mobile
- 9. Advance UI apps with responsive features
- 10. Mathematical applications for mobile
- 11. API based application
- 12. Weather information apps using APIs and live database
- 13. Artificial intelligence apps using machine learning
- 14. AI and ML based apps like chatbot, garbage collector etc.
